DETAILED ACTION

This Office Action is in response to an Amendment filed on 9/16/2005.

Currently, claims 1-19 are pending.

Allowable Subject Matter

1. Claims 1-19 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art, either singly or in combination fails to anticipate or render obvious, the limitations of:
...after implanting the impurity ions of the first and second conductivity types, performing pre-annealing at a first substrate temperature; and
after the pre-annealing, performing main activation for the impurity ions of the first and second types at a second substrate temperature higher than the first substrate temperature for a treatment period shorter than a period of the pre-annealing, as required by claim 1.

The prior art shows a pre-anneal step with one conductivity type present followed by the implantation of the second, or the second temperature at a lower temperature than the first substrate temperature.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
